## DETAILED ACTION

### *Claims Cancellation*

1. The request for cancel claim 1 filed on 05/02/2001 without prejudice or disclaimer has been noticed and entered.

### *Claim Objections*

2. Claims 2-4 and 56 are objected to because of the following informalities:

Regarding claim 56, this claim depends on itself. Please make a correction.

Regarding claim 2, this claim depends on the canceled claim 1. Please make the correction.

Regarding claims 3 and 4, these claims depend on the objected claim 2.

### *Double Patenting*

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 5-13, 15-22, 24-26, 42, 45-48, 51, 54 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 3-8, 14-27, 41, 49, 52, 55, and 56 of prior U.S.

Patent No. 6,807,165. This is a double patenting rejection.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 2661

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 33 and 35 are rejected under the judicially created doctrine of double patenting over claims 31 and 34, of U. S. Patent No. 6,807,165 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application's claims 33 and 35 merely broaden the scope of claims 31 and 34 of U.S. application No. 6,807,165 by eliminating "terminals of said series of terminals, computer means and memory means for storing", "before said step (a): (c) said terminal transmitting a registration request signal over said control channel for registering... (e) said step (b) comprising adjusting said power...", . It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184 (CCPA). Also note *Ex parte Rainu*, 168 USPQ 375 (Bd. App. 1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art.

7. Claims 3, 36-40, 52, 53, 55, and 56 are rejected under the judicially created doctrine of double patenting over claims 2, 34, 39, 40, 35, and 36 of U. S. Patent No. 6,807,165 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Regarding claim 36, the subject matter “ (c) said terminal transmitting a registration request signal ... (e) said step (b) comprising adjusting said power level in accordance with path-loss variation and noise level from said step (d)” is disclosed in claim 34 of US Patent 6,807,165.

Regarding claims 3 and 37-40, the subject matter is disclosed in claims 2, 39, 40, 35, and 36 of US Patent 6,807,165.

Regarding claims 52, 53, 55, and 56, the subject matter is fully disclosed in claims 50, 51, 53, and 54 of US Patent 6,807,165.

Therefore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

8. Claims 2-50 of this application conflict with claims 2-50 of Application No. 09/846,499. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

9. Claims 2-50 of this application conflict with claims 2-50 of Application No. 09/847,170. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the

absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

10. Claims 2-50 of this application conflict with claims 2-50 of Application No. 09/846,480. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

11. Claims 2-50 of this application conflict with claims 2-50 of Application No. 09/846,434. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

12. Claims 2-50 of this application conflict with claims 2-50 of Application No. 09/846,479. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.
